9 December 1954

MEMORANDUM FOR: Colonel White

STATINTL

SUBJECT : Proposed Agency Regulation [REDACTED]

STATINTL

1. The subject Regulation is proposed by the Chief of Logistics for the purpose of clarifying the responsibilities of the major components of the Agency to the Chief of Logistics for logistical planning. It prescribes policy and responsibility for logistical planning and its relation to operations planning, which is a complete about-face from existing authority which directs Logistics to furnish such assistance when requested by operations.

2. In view of this radical change, with which, by the way, I am in complete agreement, this does not appear to be the type of Regulation which should be sent out for formal coordination. It is suggested, therefore, that if you concur in the policy of the proposed Regulation, the Chief of Logistics should be requested to discuss it with the Deputy Director (Plans) and others, and obtain their concurrence. If such concurrences can be obtained, the proposed Regulation should be submitted to the Director's Office for a policy decision.
